

MOHAMMAD EBRAHIM

CYBER SECURITY RESEARCHER

CONTACT

- 734.883.2142
- msackran@umich.edu
- Ypsilanti, MI

EDUCATION & CERTIFICATE

BACHELORS OF SCIENCE IN CYBERSECURITY

EASTERN MICHIGAN UNIVERSITY

GRADUATED MAY 2025

GPA 3.94

ASSOCIATES IN APPLIED SCIENCE CYBERSECURITY

WASHTENAW COMMUNITY COLLEGE

GRADUATED JAN 2024

GPA 3.83

FAA PRIVATE PILOT CERTIFICATE (SINGLE ENGINE LAND)

ISSUED APRIL 2026

EXPERTISE

- IDA Pro, WinDbg, Binary Ninja
- Python, Bash, SQL, HTML/CSS
- Metasploit, Burp, Nessus
- Suricata, Wireshark, Packet Tracer
- Security Onion, ELK Stack
- Windows, Linux (Kali & Arch)
- AWS, MongoDB deployments
- pfSense, IDS testing
- VMware, VirtualBox labs
- OWASP Top 10, CVE analysis

SECURITY RESEARCH & PROJECTS

WINRAR UnRAR.dll vulnerability researcher – Discovered a stack-exhaustion vulnerability (CVSS 8.7, High) in WinRAR's UnRAR.dll, triggered by crafted RAR archives; built a reproducible proof-of-concept and responsibly disclosed it to RARLAB, which confirmed the issue (CVE assignment pending).

Angel Dust – Built an AI-assisted fuzzing tool that surfaced reproducible crashes in 7-Zip and VLC, confirmed by maintainers.

Wolvsec - Won 1st place in the MISEC competition through strong teamwork, and problem-solving, while connecting with professionals at conferences like DEFCON.

2marines Hackathon – Worked as a team to build a Python-based AI Agent & advised on data security.

Zerobit Crypto Bot – Used ML to filter through 600+ Strategies & Indicators to trade Perpetual Futures.

PROFESSIONAL EXPERIENCES

Pearl Consulting Group Sep 2026 – Present
Cyber Security Apprentice

- Assessed enterprise AI tools (Copilot, Claude, Wrike) for prompt injection, data leakage, and permission/agent risks; recommended security controls aligned with NIST AI RMF, ISO 42001, and OWASP.

Dementia & Parkinson's Home Care Jan 2022 – Present
Founder

- Founded a non-medical agency and built its custom Flutter app.
